

***The Power of One:
Make a Difference with the Right Sum***

FYE Co-Curricular Activities (CCA)

Purpose: To be aware of the many campus resources available for your success and make connections with the university and each other, which in turn, leads to a richer campus experience. Students connected to the university generally get higher grades and return as sophomores.

Requirements: Complete five co-curricular reflections for a total of 25 points. The first FYE co-curricular activity is due midnight September 1, 2006 and is specified below. The last activity is due Friday, December 8. Remaining activities may be chosen from the options on the attached list under **F** and **Y**. Submit a one page typed description and critique of each of these events to both instructors. Up to 6 extra credit points (from the **E** list) are available for the initiated. These reflections are due on or before these Fridays of the semester: September 29, October 27, and November 10. Late work will not be accepted.

FYE Activity 1: Due before Friday, September 1:

E-mail LaMaster and Ellsworth (separately please!) using your IPFW email address sharing with him or her what you want to get out of the course and how it is going for you.

FYE Activity 5: Due Friday, December 8

We believe you have something unique to contribute. How did you make a difference this semester?

F

5 points each

- Attend an Academic Workshop. (See <http://www.ipfw.edu/accs/academic/workshops/>)
- Attend CASA Drop-In Tutoring. (See <http://www.ipfw.edu/casa/Tutoring>)
- Attend CASA One-on-One Tutoring. (Again see <http://www.ipfw.edu/casa/Tutoring>)
- Meet with a Writing Center consultant (See <http://www.ipfw.edu/casa/WC>)
- Use common office hours with another instructor. (See http://www.ipfw.edu/math/common_off.html)
- Interview an IPFW instructor.
- Participate in a study group session
- Borrow one of the math anxiety videos on reserve at the library.
(See http://www.ipfw.edu/math/anx_materials.html)
- Find a newspaper or magazine article which uses the mathematical models discussed in class.
- Write a letter to the editor to the Communicator or a city newspaper. (If published, you get an extra 2 points!)
- Use the Bulletin to map out the courses you need to take for the next two semesters.
- An instructor approved alternative

Y

5 points each
