**Introduction to**  
**Macroeconomics**  
**Fall 2009**

**INSTRUCTOR:** Dr. Ali Rassuli      **OFFICE:** KT 267      **OFFICE PHONE:** (260) 481-5771

**COURSE PREREQUISITES:** E201 or equivalent.

(NOTE: Under the policies of the School, prerequisites will be strictly enforced.)

**TEXTS:** 1. Macroeconomics, Roger A. Arnold, 9th edition (2010)  
2. Study Guide, Roger A. Arnold, 9th edition (2010)

**COURSE OBJECTIVES:**

Growth cycles, unemployment, and inflation are central issues in macroeconomics. In this class, the students will learn:

1. A framework within which these central macro issues are measured and observed overtime.
2. How major schools of economic thoughts have approached macroeconomic problems and suggested remedies.
3. Kinds of consensus that have formed over time on the functional relationships between macroeconomic variables based on experience and empiricism.
4. How government is trying to stabilize the macro economy through fiscal and monetary policies and simultaneously adjust for the challenges of the global economy.

# Examinations and Grading Procedures

Your course grade will depend upon three examinations and your class/group participation as follows:

Two (2) exams, each.....	30%
One semi-comprehensive final exam.....	30%
Group participation and class discussions.....	10%

Each exam will consist of 50 multiple-choice questions worth 2 points each. Final grades will be determined according to the standard university scale (i.e., 90-100% = A, 80-89% = B, 70-79% = C, and so forth).

Make-up exams will be arranged only under extraordinary circumstances. Make-up exams are given at my discretion and may be essay exams to be taken **prior to** the next scheduled exam.

Exam questions are designed to test your **understanding** of the economic concepts and principles presented in class. Success in this class will be primarily a function of understanding, **not memorization!** The exams will require more than recall—they will also require application and analysis. Economics is often described as a way of thinking, and success in this course requires such thinking. Group learning activities and class discussions are designed to aid you in accomplishing this task; i.e., to help you **think and apply like an economist**
